

EKM8T MCCB 125AF~1250AF

Thermo-Magnetic Double Adjustable Type MCCB

Standard_ IEC60947-2

Product Overview

EKM8T series range of molded case circuit breakers with adjustable thermal magnetic trip unit. These breakers provide line protection and motor protection. These MCCB are suitable for use with AC 50Hz, rated voltage of 690V and below, and rated current up to 1250A.

- Frame size: 125A, 160A, 250A, 400A, 630A, 800A, 1250A
- Rated operational voltage U_e (V/AC): 230/400/415/690
- Breaking capacity code: C, S, H, UH
- Number of poles: 3P, 4P
- Trip unit type: thermal magnetic type
- Installation method: Fixed type; plug-in type
- Thermal adjustable range $(0.7\sim 1)I_n$, magnetic adjustable range $(5\sim 10)I_n$

Nameplate Interpretation

- ① Company LOGO
- ② Product model
- ③ U_e : Rated operational voltage
- ④ CatA: Utilization category of breaker
- ⑤ Frequency of A.C.
- ⑥ Electrical symbol for circuit breaker with isolating function
- ⑦ I_{cu}/I_{cs} : Ultimate short circuit breaking capacity/Service short circuit breaking capacity
- ⑧ $+40^\circ\text{C}$: Ambient temperature

- ⑨ Not applicable to IT systems
- ⑩ U_i : Rated insulation voltage
- ⑪ I_n : Rated operational current
- ⑫ IR: Long-time-delay setting current range
- ⑬ The product is in conformity with standard IEC/EN 60947.2
- ⑭ Molded Case Circuit Breaker
- ⑮ U_{imp} : Rated impulsive withstand voltage
- ⑯ CE certification

Thermal and Magnetic

Protection

The circuit breaker equipped with TM thermomagnetic release is mainly for protection of the cable, which is on the power distribution system for transformer power supply.

Overload protection: thermal protection Ir (Adjustable)

The overload protection function provides inverse time limit curve on the basis of bimetal. If the limit is exceeded, the deformation of the bimetal can lead in the tripping of the circuit breaker operating mechanism.

Thermal adjustable range: 0.7~1.0In

Test No.	I/In	Conventional time	Breaker status	Initial status
1	1.05	> 1h(In ≤ 63A) > 2h(In > 63A)	Non-tripping	Cold status
2	1.3	≤ 1h(In ≤ 63A) ≤ 2h(In > 63A)	Tripping	Immediately after test 1

Note: For 160A breaker, rated current is under 50A, only have thermal adjustable breaker.

Short circuit protection: magnetic protection li (Adjustable)

Magnetic protection achieves short circuit protection through a magnetic trip device. The circuit breaker will trip instantaneously.

Magnetic adjustable range: 5~10In

Test No.	I	Breaker status	Conventional time
1	90%li	Non-tripping	≥ 0.2s
2	120%li	Tripping	≤ 0.2s

EKM8T MCCB 125AF~1250AF

Thermo-Magnetic Double Adjustable Type MCCB ----- Standard_ IEC60947-2

MCCB Selection Code

Product code	Frame size code	Breaking capacity code	Operation way code ①	Number of poles code	Trip unit type code
EKM8T	- 160	H	P1	/ 4	3
EKM8T Series thermal magnetic double adjustable type MCCB	125: 125A (Only available for EKM8T/A)	C: Basic type	No code: Direct operation	3: 3P	3: Thermal + Electromagnetic release
	160: 160A		P1: DC3 electric operation		
		250: 250A	P2: DC6 series electric operation		
	400: 400A		S: Standard type		
		630: 630A	H: High breaking type	ZF1: Turning handle (hand-operated center type-square handle)	
	ZY2: Turning handle (hand-operated eccentric type-round handle)				
	800: 800A	UH: Extra-high breaking type	ZF2: Turning handle (hand-operated eccentric type-square handle)		
1250: 1250A	Z3: Turning handle (Hand-operated one-piece type) (Only available for 125, 160, 250)				

Note: ① The voltage of electric operation is divided into: DC24, DC110V, DC220V, AC230V, AC400V; Conventional production is AC230V.

Inner accessories code ②	Product with N pole the code is selectable	Mounting and wiring options code ③	Protective accessories code ④	Rated current	
00	B	/ P	Z	In=100A	
See accessory table	A: There is no over-current protection at pole N and the N pole is always connected.	No designation : Front panel wiring (fixed)	No code: General products	125: 20,25,32,40,50,63, 80,100,125A	
		P: Coupling row (extended copper row)		160: 20,25,32,40,50,63, 80,100,125,160A	
	B: There is no over-current protection at pole N and N-pole operates with other three poles.	Z1: Rear connection (fixed type)		250: 160,180,200,225, 250A	
		Z2Q: Plug-in front connection (split type)		400: 315,350,400A	
	C: There is over-current protection at pole N and N-pole operates with other three poles.	Z2H: Plug-in rear connection (split type)		Z: Terminal cover	630: 320,350,400,500, 630A
		Z3Q: Plug-in front connection (one-piece)			800: 630,700,800A
		Z3H: Plug-in rear connection (one-piece)			1250: 630,700,800, 1000,1250A
	D: There is over-current protection at pole N and the N pole is always connected.	DF: Draw-out type front connection			
		DR: Draw-out type rear connection			

② Conventional factory default is the lead type: wire length 500mm (other lengths need to be customized);

Can be customized terminal type; undervoltage accessories are only terminal type.

③ 125, 160, 250 no pull-out; 1250, 2000 with coupling row only.

④ Terminal cover is only available for 3P;

400 and 630 are divided into narrow and long models, and wide and long models, and the default is wide and long models.
